

Top 5 Safety Tips

1. Age

Follow the age recommendations on labels when buying toys for your child. Age recommendations are about safety and not the ability of your child.

2. Size test

Do the toilet paper roll test: if a toy is small enough to fit inside the roll, it is too small to give to children under 3 years old.

3. Warranty

Send in the warranty card (if applicable). You will be notified if there is a product recall. Check for other recalls at <http://healthycanadians.gc.ca/recall-alert-rappel-avis/index-eng.php>

4. Hazards

Make sure that toys and play equipment are put together based on manufacturer directions. Avoid toys with magnets or batteries if you have small children. Secure toys or play equipment that have batteries with either screws or tape.

5. Active Supervision

Keep an eye on your child during playtime to make sure he or she is having fun and interacting with the toy as intended. Have fun!
